Cybersecurity - trusted Guardian for Siemens and its Customers!

Juergen Schlette
(GID: Z0042SCW)

successfully completed the above mentioned course on 15-JUN-2021 (duration: 00:30 hours).

Cybersecurity is very important in any place and environment. Every day, at Siemens and in our customers' or vendors' systems, there are intrusion attempts and incidents can occur. Cybercriminals are constantly trying to gain access, steal confidential information, make money, or cause harm in some way. This can endanger information, computer systems, operations, and ultimately, everything!

This training has been developed for you to understand how you can protect yourself, Siemens and its Customers - in the best possible way and in all environments!

The topics covered are as follows:
- secure use of programs and tools;
- phishing methods;
- password security and MFA;
- information classification;
- mobile working/home office security;
- secure communication

from PSS (Product & Solution Security) to OT (Operational Technology) and IT (Information Technology) environment.

Roland Busch
President and Chief Executive Officer of Siemens AG
Member of the Managing Board of Siemens AG
